Introduce me **Ahmad Riady Sugino** a Website and Apps developer. Since high school i am happy with the world of programming. in 2015 i make web creation services, and in 2016 i add a services that is making android apps. My experience of creating Website and Apps has been more than 8 years. some project i've done is ERP and mobile apps for large business, handle concurrent user connection for more than 1k user at the same time. and handle some goverment project.

Professional Skills

HTML, CSS and JQuery

Level: Advanced

PHP (Slim, Codelgniter and Laravel)

Level: Advanced

Javascript (Express JS, VueJS, Svelte, MeteorJS)

Level: Advanced

Python

Level: Proficient / Intermediate

Apps Dev (Java, Kotlin, and Dart - Flutter)

Level: Proficient / Intermediate

Databases (Mysql, PostgreSQL, Firebase, MongoDB)

Level: Proficient / Intermediate

Platforms (Wordpress, Prestashop, and Magento)

Level: Proficient / Intermediate

Server Config (Cpanel, Nginx, Docker and Cloud)

Level: Proficient / Intermediate

Work History

Full Stack Developer, Growsire, Oct 2019-Oct 2020

1. Developed a good back-end system that is integrated with payment gateways.
2. Developed mobile apps for consumers online orders, live tracking and monitoring.

Application Developer, PT KST Indonesia, Jan 2021- Dec 2025

1. Designed and implemented robust, fast, and easy-to-integrate APIs optimized for performance and scalability, ensuring secure access, proper authorization management, and thorough documentation.
2. Optimized data distribution flows between systems, reducing latency, improving data transfer efficiency, and maximizing the use of available bandwidth and resources.
3. Improved database design and query performance, reducing response time while maintaining data consistency and integrity, even at large scales.
4. Designed and implemented user-friendly, scalable POS systems integrated with various payment methods, inventory management and transactional reporting features.
5. Built and enhanced ERP modules for efficient product, inventory, and sales management, integrating automated reporting and supply chain management features.
6. Created modular microservices architecture allowing independent development, deployment, and maintenance of components to improve system flexibility and scalability.
7. Developed modern, interactive, and user-friendly front-end interfaces for web and mobile applications, ensuring a high-quality user experience (UX) and responsive design across devices.
8. Handled and processed large-scale data using big data technologies, implementing efficient solutions for data storage, processing, and analysis.
9. Designed and implemented services integrated with artificial intelligence (AI) technologies, such as machine learning, to automate business processes, support decision-making, and enable predictive analysis.

Senior Full Stack Developer, PT Capture Data Teknologi, Jan 2026- Now

1. Designed and architected stable, highly scalable, and fault-tolerant distributed systems to support growing user bases and business demands.
2. Managed and monitored production servers and cloud infrastructure, implementing proactive alerting systems to ensure maximum uptime and performance.
3. Led and mentored a team of junior and mid-level developers, conducting rigorous code reviews to maintain high standards of code quality and security.
4. Optimized application performance across the entire stack, significantly reducing database query times, page load latencies, and API response overhead.
5. Streamlined CI/CD pipelines (Continuous Integration/Continuous Deployment) to automate testing and deployment processes, accelerating release cycles.
6. Collaborated closely with cross-functional teams, including Product Managers, UX/UI designers, and stakeholders, to translate complex business requirements into technical solutions.
7. Enforced security best practices (such as OWASP top 10) across frontend and backend systems, implementing robust authentication, authorization, and data encryption.
